EXPERIENCE

Alpha Omega Integration - USCIS | Product Manager | Brooklyn, NY | 2026 - Present

- Currently leading a 5 person team of engineers and designers for a federal platform with 15K DAU.
- Conducted extensive data driven analysis and user research within the User Support workstream; now launching several new features to address root cause of longstanding usability issues.
- Owns entire product lifecycle from problem discovery through feature launch.
- Balances competing stakeholder needs and long term vs. short term tradeoffs in a constantly evolving policy landscape.

Okta | Developer Support Engineer | Washington, DC | 2020-2022

- Synthesized enterprise customer insights into actionable feedback; partnered with product and engineering to prioritize bug fixes and influence roadmap decisions, improving product quality and overall user experience.
- Designed and launched a centralized tool to reduce repetitive, siloed troubleshooting. Led research, documentation, and onboarding improvements, ultimately reducing average support engineer case volume by 30%.

Excella Consulting | Consultant - Product Manager | Washington, DC | 2017-2020

- Led discovery, user story creation, and iterative roadmapping across a 15-person team.
- Collaborated with engineering, design, and federal agency stakeholders and shipped features to build the digital Open Opportunities platform from the ground up to, resulting in 110,000+ active users.

Cushman and Wakefield | Marketing Coordinator | Washington, DC | 2016

- Cultivated strong relationships with Fortune 500 clients and cross functional teams to deliver high impact campaigns and ensured efficient spend aligned to each client's marketing goals.

Thought for Food | Product and Community Engagement | Lisbon, Portugal | 2014-2016

- Built a digital learning platform end-to-end, including discovery, user research, defining requirements, prioritizing the roadmap, and guiding design and engineering delivery.
- Ran user research and community programs that grew usage from 10 to 1,000+ users in 30+ countries.

EDUCATION

Flatiron School | Full Stack Software Engineering

2020

Texas A&M University | B.A. International Affairs

2012

SKILLS

- Technical fluency (agentic AI, frontend and backend languages, AWS, system architecture)
